SUMMARY

Full-Stack Developer with 3+ years of professional experience architecting and shipping production SaaS products end-to-end. At AaladinAI, a software agency serving international clients, served as de facto project lead and co-product manager for Fuel AI — a 24-screen AI-powered CRM — coordinating the team and driving development timelines as the sole engineer with full project visibility. Built the complete frontend independently, contributed to backend API integration and AI workflow logic, and implemented a drag-and-drop visual funnel builder (React Flow) used by 600+ non-technical users. Currently building Nexus Agent, a multi-tenant messaging SaaS with Spring Boot hexagonal architecture, Resilience4j circuit breakers, and AES-256-GCM encryption. Pursuing B.Sc in Software Engineering at Daffodil International University. Available for remote, hybrid, or relocation opportunities worldwide.

EXPERIENCE

Full-Stack Developer & Project Lead

AaladinAI 07/2024 - 03/2025 Gulshan, Dhaka, Bangladesh

Software development agency delivering contracted projects for international clients including Scale Build AI (New York).

- Led the project as de facto product manager** — coordinated team priorities, defined feature requirements, and drove development timelines for a 24-screen SaaS platform with no dedicated PM on the team
- Architected and delivered the entire frontend solo** — built 24+ screens for the dashboard and lead management system using Next.js, React, TypeScript, Tailwind CSS, and ShadCN components as the sole frontend engineer
- Contributed to backend and AI integration** — engineered 5+ NestJS API endpoints and collaborated on a Python AI brain for automated lead engagement, NLU-based response interpretation, and dynamic prompt generation
- Shipped an interactive visual funnel editor** (React Flow), enabling 600+ non-technical users to automate multi-channel communication workflows across Email, SMS, LinkedIn, and Messenger
- Secured the platform** with JWT-based authentication, role-based access control, and 2FA backup code system across a fully separated frontend/backend architecture
- Launched the official agency website (aaladin.ai)** — the agency's primary marketing presence, attracting 8,000+ lifetime visitors, built with Next.js and Tailwind CSS

Frontend Developer

Golden Vault 11/2023 - 06/2024 Savar, Dhaka, Bangladesh

Student-founded challenge-based learning and mentorship platform connecting learners with industry professionals.

- Redesigned and rebuilt the entire UI/UX** across all 6 pages from scratch — improved usability, mobile responsiveness, and visual consistency across the platform
- Re-engineered the frontend** with React, Next.js, and Tailwind CSS; modernized the component architecture to improve page load performance and navigation clarity
- Built the mentorship system** — created the admin panel for adding mentors, booking mentorship sessions, and managing mentor-mentee relationships, successfully onboarding 9 mentors to the platform
- Shipped the platform end-to-end** in collaboration with the founding team, taking it from concept to a live, publicly accessible product at goldenvault.org

EDUCATION

Bachelor of Science in Software Engineering

Daffodil International University

07/2023 - Present Dhaka, Bangladesh

TECHNICAL STACK

Front-End Development

React · Next.js · TypeScript · JavaScript · Tailwind CSS · ShadCN/UI · HTML5 · CSS3

Back-End Development

Java · Spring Boot · Node.js · Express.js · NestJS · Python · FastAPI · REST APIs

Databases

PostgreSQL · MongoDB · Redis · pgvector

DevOps

Docker · Docker Compose · Git · GitHub · Vercel · Netlify · Nginx

AI/ML

RAG Pipelines · LangChain · LLM Integration · Prompt Engineering

Other

JWT Auth · Firebase · Stripe · WooCommerce · React Flow · Tina CMS · SEO

PROJECTS & PORTFOLIO

Nexus Agent — Multi-Tenant Messaging SaaS

2025 - Present

Founder and lead architect of a multi-tenant messaging platform that unifies business communication across Email, WhatsApp, Discord, Notion, Slack, and SMS through a single REST API.

- Architected the Connection Brain (Spring Boot)** as a hexagonal (Ports & Adapters) microservice in Java 21 with platform adapters for SendGrid (Email), Meta Cloud API (WhatsApp), JDA 5.x (Discord), and Notion API
- Built production-grade resilience and security** — Resilience4j circuit breakers, Bucket4j rate limiting, AES-256-GCM credential encryption, and SHA-256-hashed X-API-Key authentication
- Delivered 68+ passing tests** (unit + integration) with full Docker Compose orchestration, PostgreSQL 17, and all 8 production verification checks passing

AaladinAI Agency Website

Built the official agency website — a modern, responsive marketing presence with services, projects, and contact sections using Next.js and Tailwind CSS, attracting 8,000+ lifetime visitors — [Live link](#)
